

Environmental Restoration & Community Stewardship

We facilitate local solutions by helping community residents build consensus around a common stewardship vision and then break complex challenges into logical, incremental and achievable steps.

Our interdisciplinary teams engage diverse interests to inspire functional stewardship partnerships that produce visible, economically viable and sustainable results.

Verslucce Meadow Community Stream Restoration & Stewardship Project

Residents wanted help to restore the original drainage and wetland meadow located in the heart of a residential subdivision. IPD helped prepare a park funding proposal and create a conceptual plan involving residents, local schools and two levels of government.

Client: Porter Creek Community Association, Whitehorse, Yukon

Clifford E. Lee Nature Sanctuary, Parkland County, Alberta

Inukshuk's Principal provided volunteer technical planning advice to the Steering Committee that acquired the original 140-acre wetlands with funding from the Clifford E. Lee Foundation. He helped negotiate an additional 160-acre expansion and ensure local planning and zoning bylaws were amended to protect the area.

Client: Canadian Nature Federation

Whitehorse Rapids Fishway Redevelopment Plan

The existing portable interpretive centre had become a victim of its own success drawing up to 30,000 visitors. IPD was asked to plan a new, more interactive and culturally appropriate learning and viewing facility linked to downtown Whitehorse by the Millennium Trail along the Yukon River.

Client: Yukon Energy Corporation
