

Landscape Architecture

We provide landscape architectural /urban design services for naturalized and urban landscapes for parks, institutional, commercial, residential and transportation related projects.

Our environmentally sensitive approach utilizing a LEED® Accredited Professional, integrates environmental considerations from conceptual planning through detailed design and construction.

Riyadh Diplomatic Quarter

This urban desert park for a newly created district of 25,000 people, involved both working with a natural escarpment and naturalizing a massive earth berm (right) screening the site from a

Telekom Malaysia Headquarters Building

A high rise building with “Sky Gardens” stepping up to the 54th floor and a landscaped plaza (above) over a parking garage on a 7-acre site, required close coordination with the architects and engineers from conceptual design through construction documents.

Markham Municipal Building

The landscape design for this town hall including a passive park around a constructed pond, helped win the
