

Oil & Gas Related Projects

Industry hires us because of our
problem-solving &
communication skills.

Our solution-oriented perspective
is reflected in our ability to
diagnose industry needs, sort
through complex issues &
produce concise, well-illustrated
technical reports that anyone
can read.

Alaska Highway & Dempster Lateral Pipeline Studies

Evaluation of land use impacts of
corridor alternatives in Whitehorse
and Dawson City regions. Work
required integrated resource analysis
including a review of mining claims,
current land status, trapline activity,
wildlife habitat and related data.

Client: Foothills Pipeline (Yukon) Ltd.

Petalta Styrene Plant

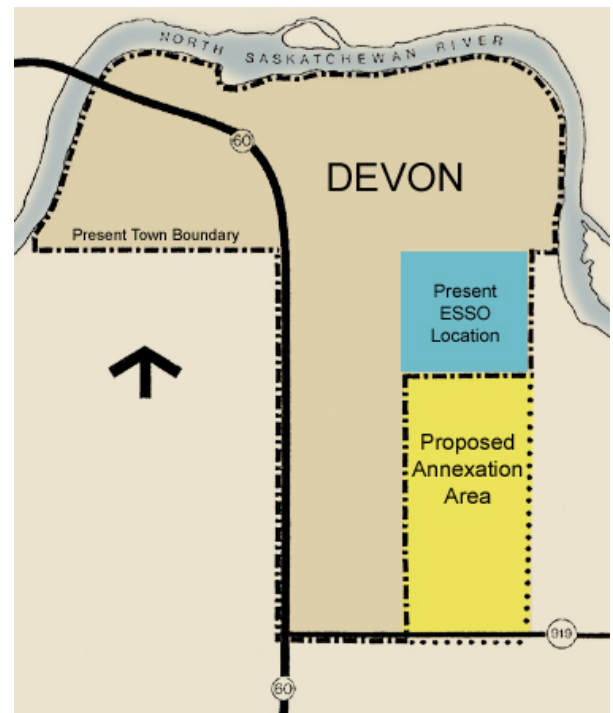

The firm's principal was hired to advise the client on site location as well as land development and approval issues related to facility site planning, landscaping and infrastructure development. Location: County of Lamont, Alberta.

Clients: Esso Chemical Canada/ Alberta Energy Company

Devon Gas Plant Expansion/Municipal Annexation

This project involved a 320-acre
annexation to protect and
prepare for future expansion of
the existing gas plant. The firm's
principal was responsible for
preparing the land development
concept, the impact assessment
studies and preparing all
annexation documents. He
facilitated the land acquisition,
inter-agency reviews and
approvals including obtaining
Council support. As a result,
formal hearings were waived
and Cabinet authorisation was
expedited.

*Clients: Esso Resources Canada/
Town of Devon, Alberta*
